# EXPERIENCE THE ART OF PERFECT FLOORING

Panora by Akij Ceramics introduces porcelain plank tiles that seamlessly blend the beauty of nature with advanced durability. Designed with streamlined grout lines, authentic textures, and a sustainable approach, Panora transforms spaces with timeless elegance.

Inspired by best practices in tile layout, Panora embraces the art of pattern. Whether installed in traditional staggered (brick-bond) patterns, dynamic herringbone, or clean linear layouts, our planks enhance architectural rhythm and spatial perception.

## **NATURAL WOOD INSPIRATION**

## **PLANKED SURFACE- NATURAL RICHNESS WITH AUTHENTICITY**

The surface with its refined design captures timeless charm of natural materials and brings intense sensations of nature and authenticity of natural wood essences to contemporary spaces.

# PANORA

## PORCELAIN PLANK TILES

### ADVANTAGES

- ☐ All Designs are inspired from Nature
- 🚶 Anti-skid
- 📐 Different architectural aesthetic pattern layouts can be created
- ⬇ Highly durable & suitable for Residential and Commercial spaces
- 🧽 Easy cleaning and suitable for high traffic areas
- 🔄 Highly resistant to abrasion, staining and chemicals
- 🌲 Very close to the real wood

A timeless design that mimics traditional timber flooring, herringbone adds sophistication and a sense of flow. Perfect for wood-effect porcelain tiles, this layout creates an elegant zigzag effect that enhances both large and compact spaces.

# OFFSET (BRICK PATTERN)

The most popular choice, where rows of plank tiles are laid parallel but slightly staggered. This creates a brick-like rhythm across the floor. Using planks of the same width offers a clean, uniform look, while mixing widths introduces energy and movement.

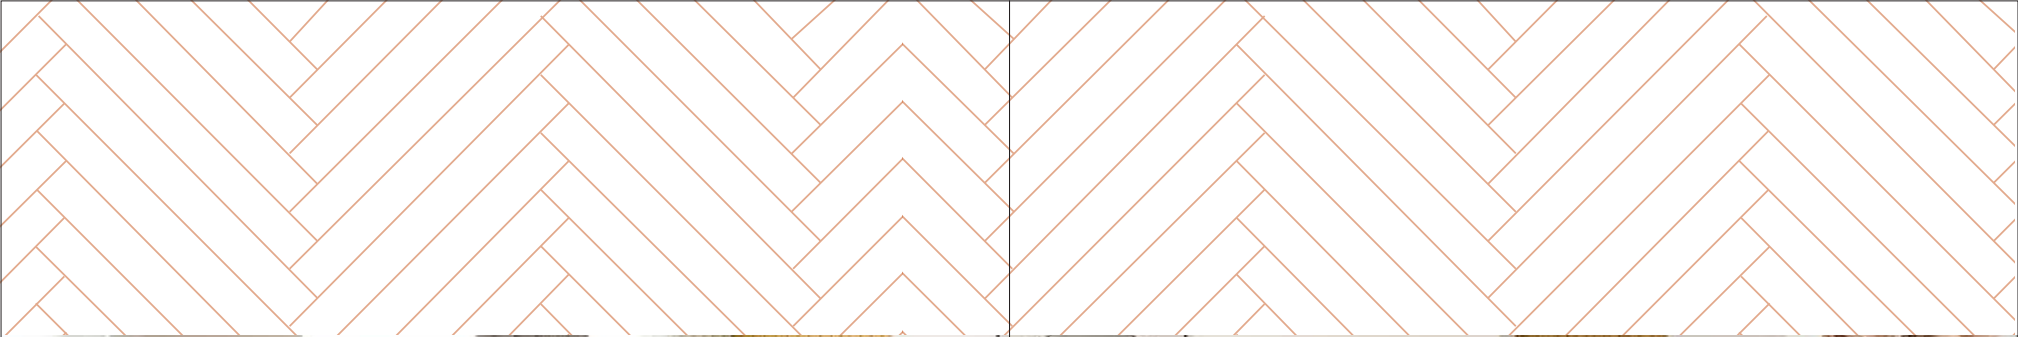

# CHEVRON

Often chosen for expansive spaces, the chevron layout delivers striking symmetry. Unlike herringbone, the planks are cut at an angle so that the ends meet in a continuous V-shaped pattern at 45°. This creates a seamless, modern aesthetic that works equally well on floors and feature walls.

# DOUBLE HERRINGBONE

Tiles are arranged in two-by-two blocks, amplifying the visual impact with a bolder, more dynamic statement.
